The results shown are not a guarantee of future returns. Return information does not include the deduction of certain custody and administrative/recordkeeping fees. The annual administration and recordkeeping fee will be determined by the State periodically. Please read page 4 under "Administration Expenses" for more detailed information. The performance data quoted represents past performance and is not an indication of future investment results. The investment return and principal value of an investment will fluctuate so that an investor's units, when redeemed, may be worth more or less than their original cost.

- (1) Foreign investments involve special risks, including currency fluctuations, economic and political instability and differences in accounting standards.
- (2) Equity securities of companies with relatively small market capitalization may be more volatile than securities of larger, more established companies.
- (3) The benchmark used for comparison with the Global Balanced Fund is a combination of 35% S&P 500, 10% Russell 2000, 15% EAFE Net Dividends to U.S. Investors, 35% Salomon Broad Investment-Grade Bond Index and 5% Salomon Bros. Non-U.S. & World Government Bond Index.
- (4) The benchmark used for comparison with the Tactical Asset Allocation fund is a combination of 60% S&P 500 index and 40% Lehman Bros. 20+ Treasury Bond Index.
- (5) This figure represents the return for the Interest Income Fund since its inception of 3/1/94.

- (1) An actively managed fund is one in which the fund manager buys, holds and sells a portfolio of stocks and/or bonds which are consistent with the fund's stated investment objective. Using a variety of methods, the active fund manager attempts to select funds that will outperform the market.
- (2) To be passively invested means to buy and hold a well-diversified portfolio of securities. Passive managers buy a portfolio of securities that comprise a market index while active managers select specific securities to attempt to outperform an index.

As a whole, the options available to you fall on the Risk Spectrum - low risk to high risk - as follows:

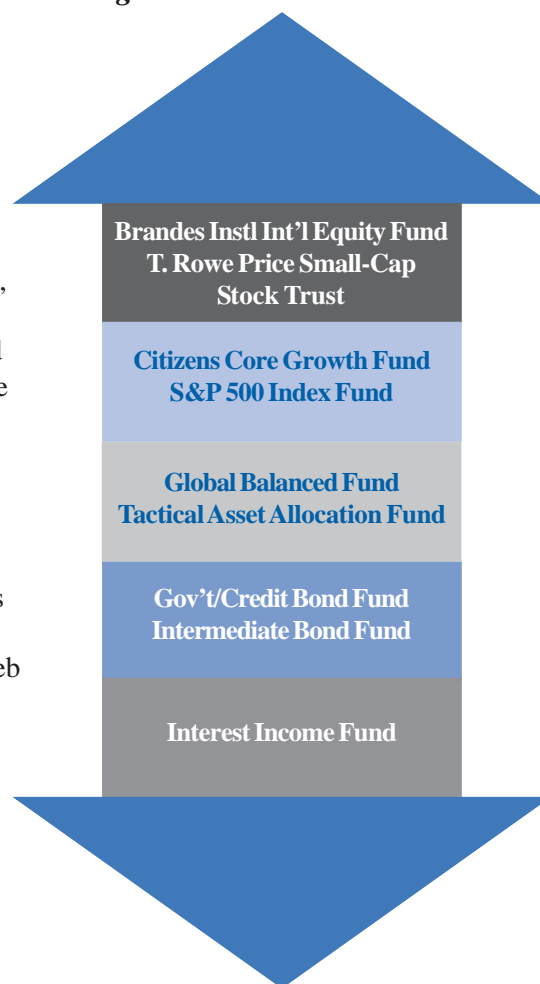

Potential Risk versus Potential Return

Generally, the greater an investment's potential return over time, the greater its level of short-term price volatility, or risk. When assessing risk, a short-term investment fund would typically appear on the very low end of the risk/return scale. A very aggressive growth fund might be depicted at the very high end of the scale. The chart to the right shows the relative position of each investment option on the risk/return scale.

Administrative Expenses

Expenses are charged to your account in order to cover the cost of administration of the plan. There is one type of fee:

Monthly — 0.18% annual rate on assets (0.0018 / 12 x month-end asset balance) — These charges will be assessed to your individual accounts against all investment options. The fee is calculated on the prior month's ending balance and is assessed in the first week of the month. The annual rate of 0.18% is effective on February 1, 2002. The prior annual rate of 0.19% applied for the period of February 1, 2001 to January 31, 2002. For example:

- * The fees calculated on your March 31st account balance will be assessed in April.
- * The fees calculated on your April 30th account balance will be assessed in May.
- * The fees calculated on your May 31st account balance will be assessed in June.

The March, April and May fees will be reflected on your June 30th statement.
